

# IP Connectivity

## SecureNet IP-VPN

### Take Control and Safeguard Your Business Communications

#### Overview

In the new digital economy, the ability to manage business communications is a key to success in every business. Being a first generation ISP in Hong Kong, HKNet leverages local industry experience and state-of-the-art IP technology of our parent company NTT Communications, offering a wide variety of fast, secure and reliable connectivity services to meet different business needs.

Private and efficient communications with your extensive business network is critical to your operations and competitiveness. Utilizing a highly advanced MPLS (Multi-Protocol Label Switching) technology-based network system, SecureNet IP-VPN service creates totally secure private tunnels to connect your branches between Hong Kong and China.

HKNet offers flexible, scalable and cost effective MPLS-based network solutions and provides access options ranging from DSL to Metro Ethernet.

#### Why HKNet?

##### High Security Levels

- Advanced MPLS network system ensuring a higher level of security
- Each IP-VPN group independently controlled with no communication with other IP-VPN groups

##### Carrier Neutral

- HKNet's multiple carriers local loop connections enable maximum local geographic coverage, high diversity options and high availability failover solutions

##### High Flexibility

- Add / delete sites within the network or increase the bandwidth of existing network flexibly
- Capable of data, voice and video transmission

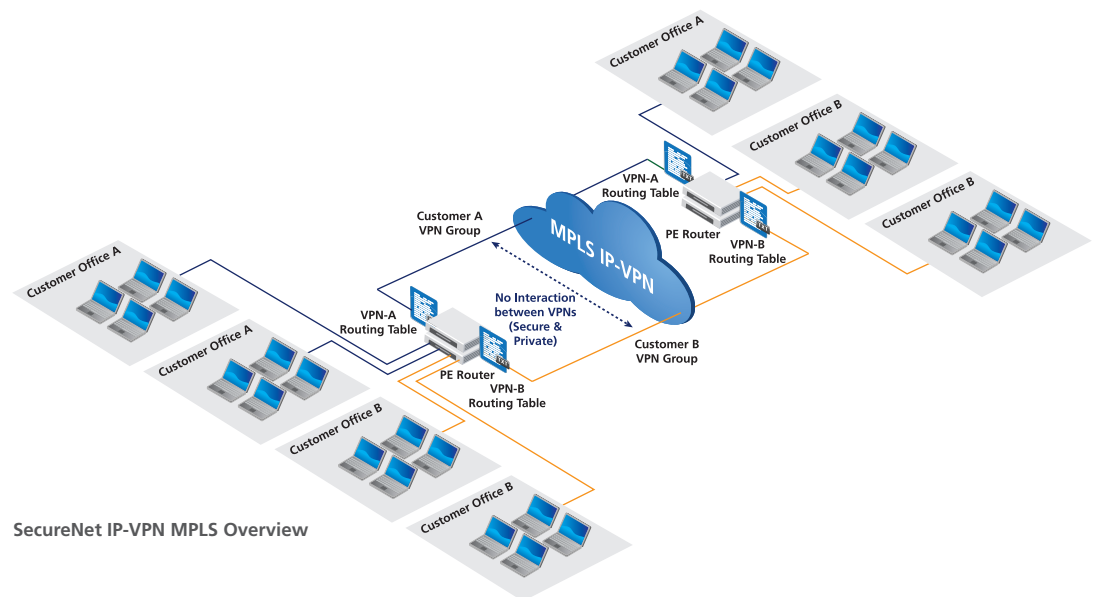

##### 100% Service Availability Guarantee

##### Extensive Coverage in China and Hong Kong

- Riding on the solid foundations and strategic partnership of NTT Communications in China, HKNet offers extensive coverage for IP-VPN service across the region

#### Service Features

- MPLS technology with a network isolated from public internet traffic
- Flexible IP address assignment
- 24 x 7 x 365 network monitoring
- One-stop solution from ordering, project management, customer support, end-to-end network management, fault reporting, to resolution and billing
- Full-mesh communication
- Backup solutions to ensure business continuity
